Just passing along as an FYI. Rich is making the change noted by the EU. We now have approval of the sampling plan and Rich and his team will begin to work on scheduling the sampling. Thanks, den.

Rich:

Understand that Terry briefly spoke with you about this

Our only remaining comment/feedback pertain to Tables 1 and 2 of both documents which shows analytical method 245.1 and needs to be deleted, as this is the analytical method for mercury, which is not to be performed.

Other than the above comment, the HQ EOC EU and OEM is good to go with the sampling plans.

Thanks,

Attached are the SAPs for Supplemental Round 1 and Round 2. We believe we have addressed all your comments. Thanks for that input. Please review and confirm that these sampling plans have your concurrence. If you should have any additional questions, please let me know.

For your information, I still need to get Ft. Meade comments (if any). I will include you all in any substantive comments they may have. Once I have received your confirmation that these plans are ok and I address any Ft. Meade comments, We will begin to schedule the sampling at the homes. We will continue to keep you advised as to our progress.

Rich
